How to Use this Chart

To get child's actual size, print out these charts. Place the first page on top of this one and align using the registration marks provided. Tape these pages together and use the instructions below.

Place your child's heel on the chart where indicated and measure to the end of the longest toe. If the longest toe is between numbers, this indicates a half size.

Infants often curl their toes. In this case, gently press down on the top of the foot to get an accurate foot size
